Camille Henrot's *Inverted Narcissist I* (2017).

On view are more than 50 works by the French artist Camille Henrot, exploring the malleability of figures. Her graceful watercolors and calm color palette belie work that is often graphic, the humans are sometimes drawn with animal heads or contorted into inhuman positions. Her work draws on the philosophies of power—how systems confine and constrict literal bodies; she references art forms like Manga cartoons where the characters traverse the seemingly fine lines of human and animal, male and female, domination and subjugation.
